

San Antonio Express-News

“If one mathematician leaves Albuquerque on a train traveling 100 mph and another mathematician boards a train in Little Rock traveling 90 mph, which of them would arrive in San Antonio first?”

“For the numerically challenged, the bigger questions may be **who cares** – and who travels by train these days anyway?”

“There is a decidedly un-nerdy bent to many of the sessions.”

“Pi equals 3.14”
